WHY CANNXPERTS?

EXPERIENCE

We are former regulators with an unparalleled 30 years of experience on all sides of regulating cannabis. For nearly ten years, we've been working with licensees, adjacent stakeholders and regulating agencies to reduce headaches, fees, fines and shutdowns and ensure optimal licensee compliance. We know how to work within the system to keep your business compliant and operational.

LONGEVITY

While other ancillary companies have come and gone, we've been building a team of experts that excels in license management and compliance support services. We're working with a broad spectrum of stakeholders to build a clear vision of what the industry expects and deserves. We're expanding our footprint, providing comprehensive, professional services to an increasing list of licensees, states and stakeholders.

SERVICE

Our clients are assigned their own CannXperts' Licensing Manager and Compliance Officer - a direct line of support available via phone, text and email to provide quick, accurate help and increased ease of mind.

Save time and money and stay focused on running and growing your business by leaving the compliance and regulatory work to us.

Create a historical record of proactive and positive compliance to increase the value of your business should you ever choose to sell.

Avoid potentially costly fines, asset seizure or a shutdown of your business caused by surprise regulatory inspections.

Ensure your business stays in legal compliance with financial institutions, insurance carriers, property managers, lenders and other partners.
